
Why Rig Control?

TIMOTHY MASSEY
AD8JL
DECEMBER, 2025

PURPOSE

Inspirational

- None: What can you do first?

Aspirational

- Some: What can you do further?

Primarily HF, but VHF/UHF included

CONTENTS

- What can it do?
- How does it work?
- What do I need?
 - Hardware
 - Tools (Software)

FOCUS

- Why you should choose!
- Next steps
 - Takeaways
 - Resources

WHY NOT?

fear

budget

confusion

value

time

help

Why haven't you moved forward with Rig Control yet?

We will give you the comfort and confidence to take the next step!

**Fluid Tech
Services, LLC**

What can Rig Control do?

Makes what you already do:

- Easier
- Faster
- Better

Add new capabilities

- New locations
- New modes

Spin the Dial

In the shack:

- KB / Mouse / LARGE screen!
- No more menus!

Outside the shack

- In your recliner (or deck)
- Around the world!

Your Assistant

Logging

- Lookup
- QSL (Awards!)

DX Hunting

- Spotting

HamClock :)

On the Air

CW

- Keyboard to CW
- Contest Monster!

Add lots of data modes

- Data pan adapter

Even helps with voice

Data Modes

Old is new again! (and easy!)

Person-to-person

- RTTY: Great to start!
- PSK31, JS8Call

Messaging

- HF Packet, Winlink

New Modes

Automated Signal Reporting (& PSA)

- FT8
 - QSO or PSK Reporter
- WSPR
 - Experimentation / A/B!

Voice: FreeDV

VHF/UHF

SSB? All of the above...

Packet – CMN MI7 Statewide!

Winlink gateway too!

Analog to Digital (DMR, Fusion)

Hotspot (MMDVM)

AllStarLink

TAKEAWAYS

Make your current use better

Give you new tools!

- Spin dial: shack or remote
- Logging, DX, spotting
- Traditional: CW / SSB / Data
- New: Chat, Voice, Data
 - And yes, signal reporting

VHF too!

- APRS/Packet/Hotspot/ASL

**Fluid Tech
Services, LLC**

How Rig Control works

Know your terms

Know the layers

Rig Control details

- Radio Management
- Audio Management

Know your Terms

“Rig Control” – Multiple items

- Radio Management
- Audio Management

Do not need both!

- But you’ll want both...

Know your Layers

Physical

- Radio, Computer, Cables

Tools

- Software you use

That's the minimum

- But you'll want more...

Radio Management

Start with what you have

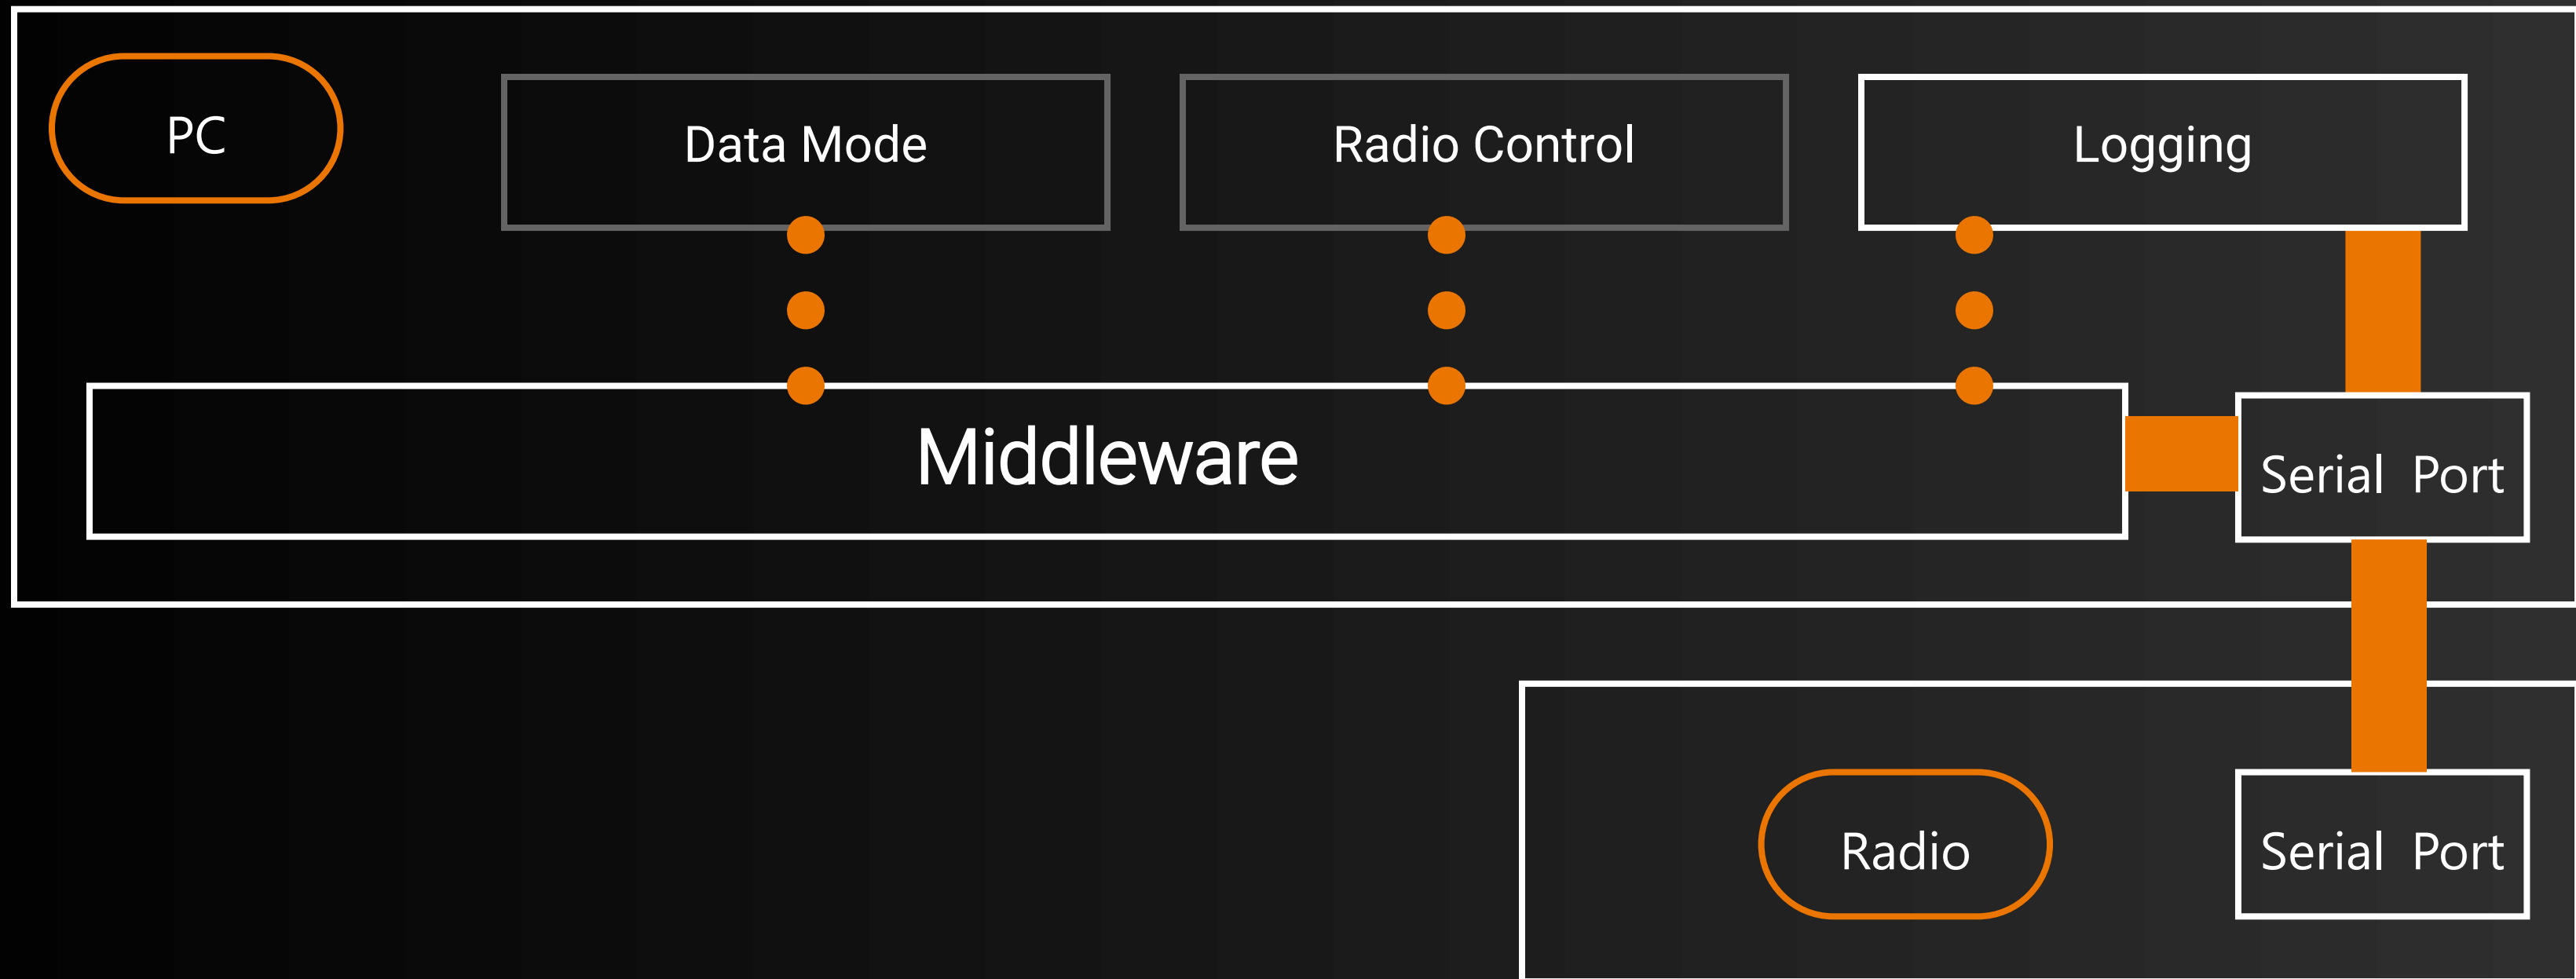

- Radio and Logging
- Works, but what about more?

No one wants to share!

- Serial: Exclusive access
- Logging and control? New modes?

Learn to share!

Middleware

Start with what you have

- Radio and Logging: simple
- Remote / Contesting / S02R: not simple!

Important decision

- Ignore direct-to-radio
- Spoiler: use Hamlib (and fIRig)

Audio Management

Radio: Line in/out (USB, DIN, 3.5mm)

PC: Some sort of USB soundcard

Tools: All use soundcard

- Pick what excites you

Sharing is not an issue

- OS has shared audio for decades...

Push to Talk

Gotta push that button!

- OS can't help you here...

Much less of an issue

- Tools won't share radio audio
- Middleware can work
 - But we can probably do better...

TAKEAWAYS

Rig Control = Radio & Audio Management

Three layers: Physical, tools, middleware

Start with radio: What does it have for...

- Radio Management
- Audio Management and PTT

Next, tools: What do they support for...

- Radio Management / Middleware

What excites you now – and next?

- Plan for both from the beginning

What does Rig Control need?

Focused on “Big 3”

Features, not specifics

Nothing budget can’t solve

- More money, less details
- DIY: You need your details

**Fluid Tech
Services, LLC**

Inspirational and Aspirational

Why, not how...

But here's a preview of how anyway.

Hardware for Rig Control

Radio management

Audio management

Push to Talk

Differentiators

**Fluid Tech
Services, LLC**

TAKEAWAYS

USB Port on radio? Ready to go!

Money solves issues: buy premade

- Value: XGGComms.com
- Simple: Signalink USB
- Want it all: Rigblaster Advantage

DIY? You must know all the details

- Radio control: serial interface details
- Audio: line in/out cables & PTT details

TAKEAWAYS

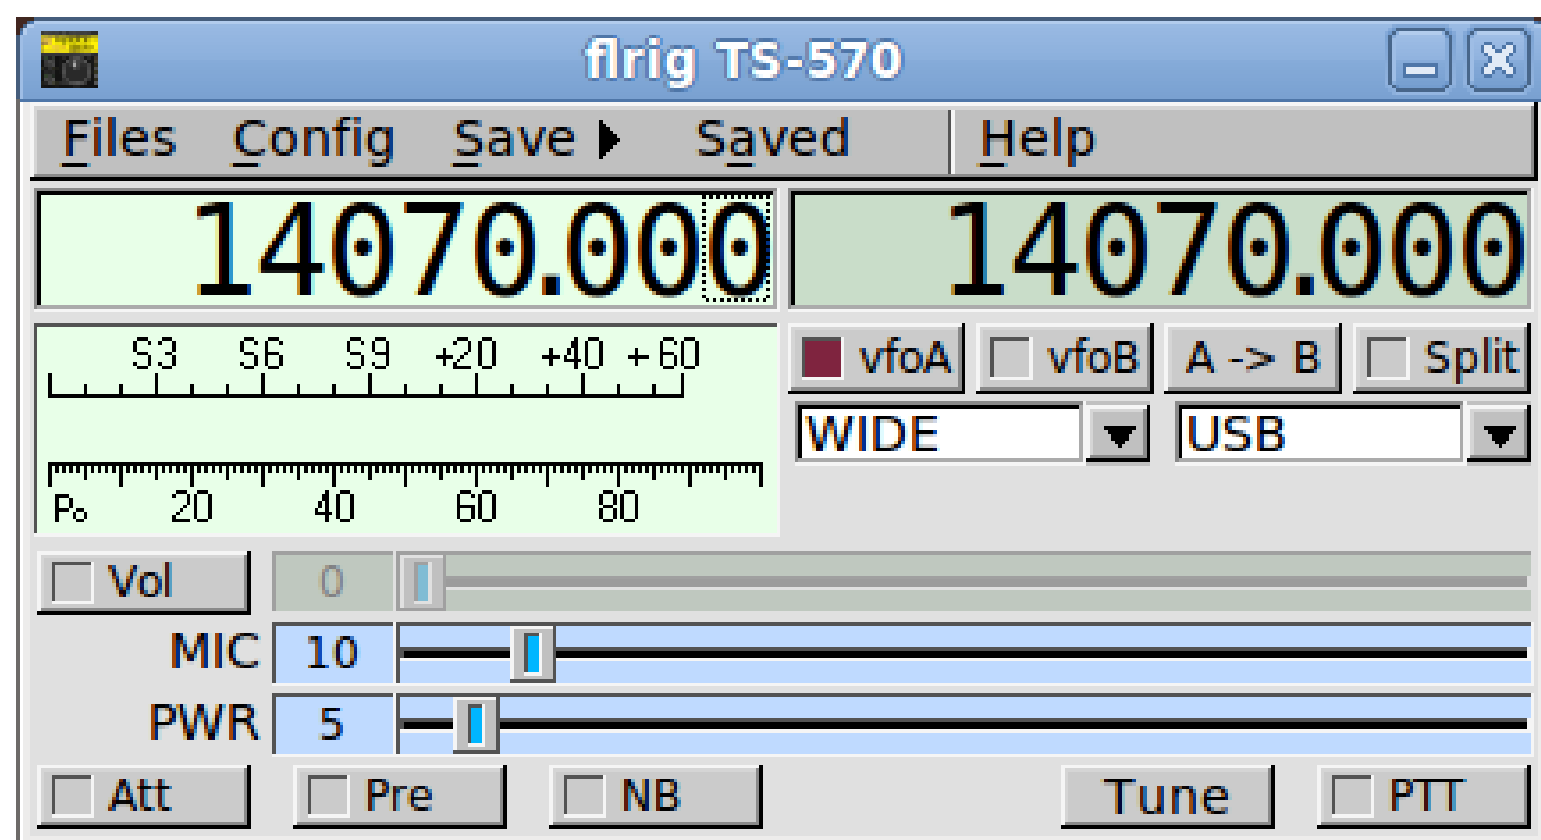

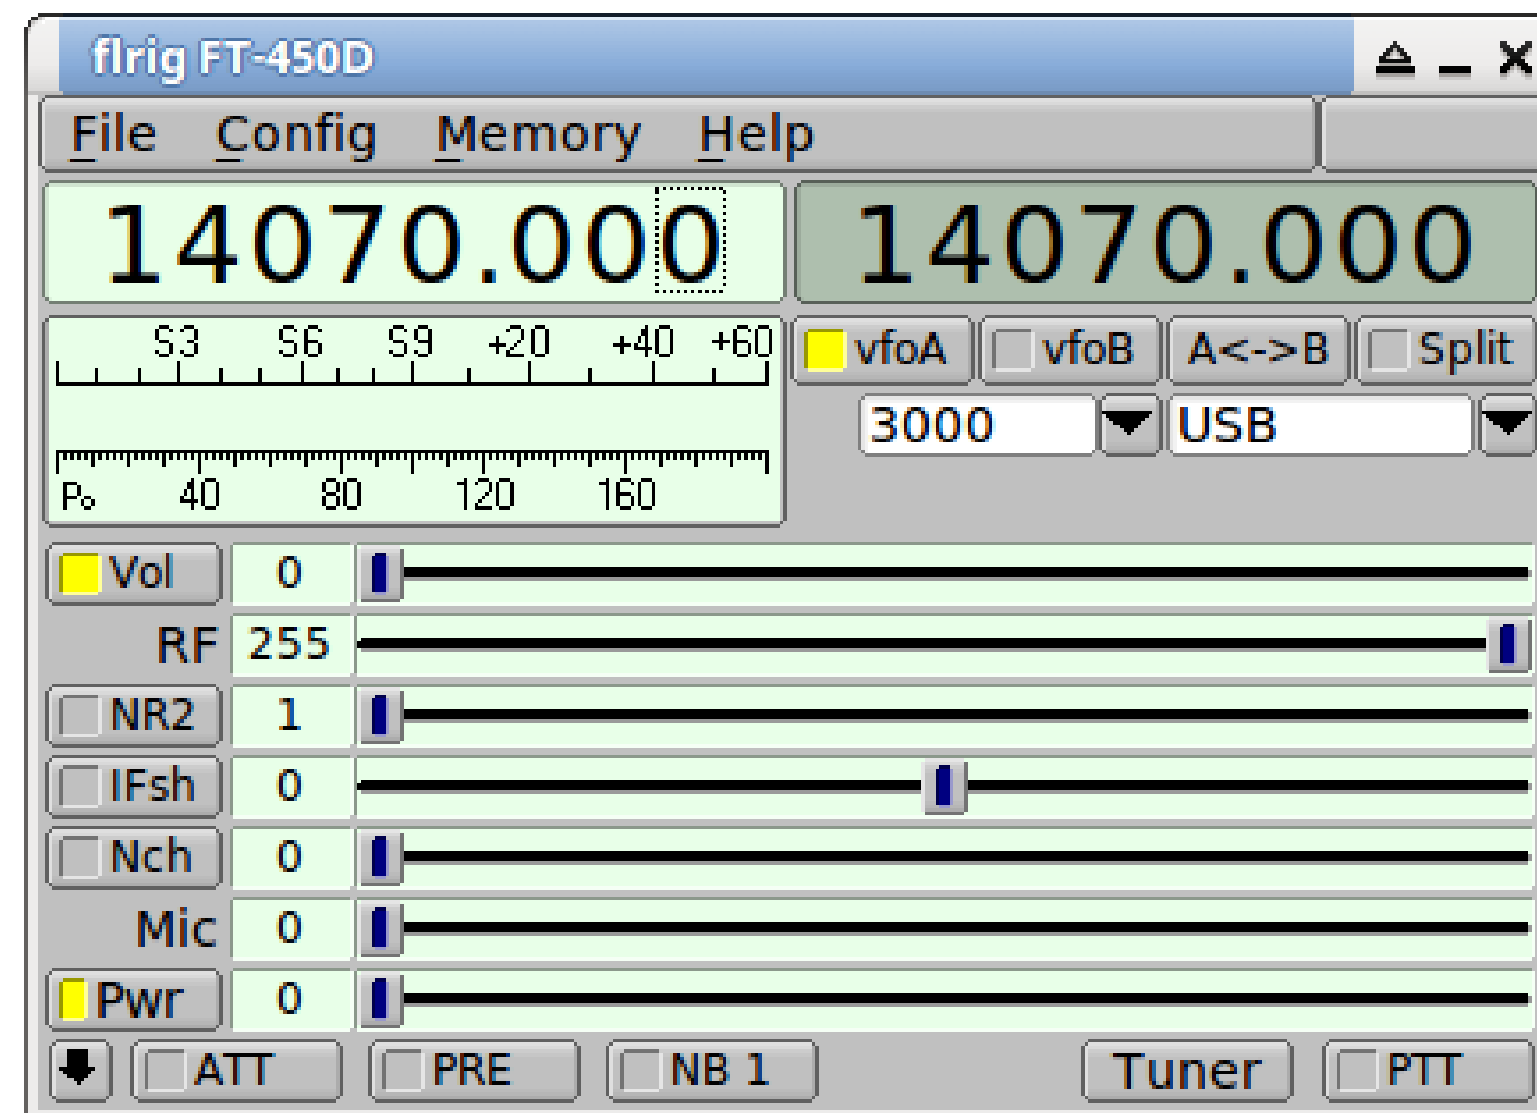

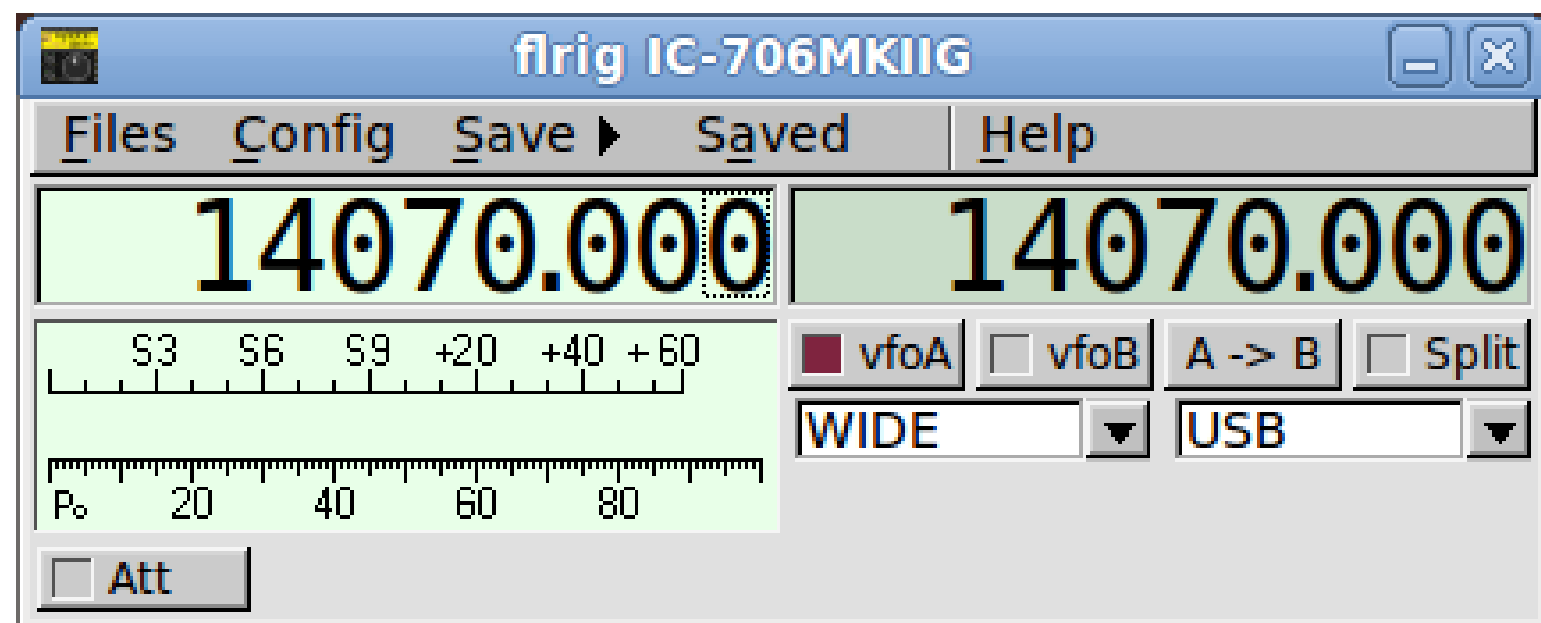

Radio control: almost always serial port

- Just have to find it – and cable to it...
- Icom CI-V: Just buy the adapter
- Pre-millennium: check for capability

Audio: find that line in/out on back

- DIN to USB sound card of some sort
- Watch for radio-specific issues
- Handle the PTT separately

TAKEAWAYS

PTT Possibilities

- Serial port (Shared or dedicated)
 - Hassle, but works
- Control command
 - Less hassle, reasonably effective
- VOX
 - Needs radio support or external device
 - Simple, reliable, effective

TAKEAWAYS

Differentiations

- How much DIY (if any)
- Fixed radio model or reconfigurable
- Integrated soundcard
- Front-panel controls
- PTT capabilities
- Audio routing
- Combined control and audio

Software Tools for Rig Control

User-facing tools

- The fun part!

Middleware

- The dull – but vital – part

**Fluid Tech
Services, LLC**

TAKEAWAYS

Understand needs of you!

- What can your current tools do?
- What are you excited to add?

Understand needs of tools

- Read radio status (e.g. logging)
- Change radio status (e.g. radio control)
- Transmit/Receive audio (e.g. new mode)

Understand sharing issues

- Radios don't share: you need a manager

TAKEAWAYS

I'm not picky, but I just want it to work!

- N1MM for heavy contesters
- HRD for everyone else

I'm picky, but I'm willing to work for it!

- Radio control: flRig (& Middleware)
- Logging: Log4OM2 (& Hamlib)
 - The two actually improve each other!
- New mode: FT8 or flDigi
 - Go for both!

TAKEAWAYS

Other options for special cases

OmniRig

- Simple and easy, but less tool support
 - Hamlib has new mindshare
 - FreeDV only supports Hamlib

Virtual Serial Ports

- Works with virtually anything
- Complex, with its own issues
- Perfect for filling missing corner cases

KEY TAKEAWAYS

What can it do?

- Make your current tools better
- Give you new tools!

How does it work?

- Two areas: radio control and audio
- Three layers: physical, tools and middleware

KEY TAKEAWAYS

What do I need?

- Computer: Serial port and soundcard
- Radio: serial cable or adapter; audio cable or external interface
- Software: All-in-one logging, or
- Radio control (flRig), logging (Log4OM2), and new mode (flDigi)
